Kindergarten 2024 – 2025 Science Program Open House

Come to Valley View School on the evening of January 18 at 6 to 7 pm to get information about registering for the alternative program – Science.

Alternative Program - Science

- 1 | In Science, students explore and investigate big questions related to the world around them. When students learn through the lens of science, they move beyond factual recall and develop the science-related attitudes, skills and knowledge needed to solve problems and make decisions. Students become lifelong learners by maintaining their sense of wonder about the world around them
- 2 | In Science, students are provided with opportunities to develop the competencies required of engaged thinkers and ethical citizens with an entrepreneurial spirit.

Is the Science Program the Right Choice for my child?

A successful student demonstrates:

- a love of science and curiosity about how the world works
- willingness to take risks in learning and is comfortable with ambiguity
- a resiliency for learning in outdoor environments in all weather conditions
- a willingness to conform to uniform regulations when/where expected
